PROJECTS

HOSTELOS – Smart Hostel Management System (Web Application)

Full-Stack Web-Based Hostel & Student Management Platform

Tech Stack: HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB Developed a smart hostel management system that helps administrators manage rooms, students, and daily hostel operations efficiently. Implemented secure user authentication, student registration, room allocation, fee tracking, and complaint management modules. Designed a responsive and user-friendly interface with clean data handling to streamline hostel administration and improve overall operational efficiency.

CARS4U – Car Rental Platform (Web Application)

Full-Stack Web-Based Vehicle Booking & Rental Management System

Tech Stack: HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB Developed a web-based car rental platform that allows users to browse available vehicles, make bookings, and manage rentals online. Implemented secure user authentication, vehicle listing management, booking and payment tracking, and admin control features. Focused on responsive UI design, efficient data handling, and improving the overall vehicle rental workflow for both customers and administrators.

Portfolio - npprajapati-portfolio

Passionate MERN Stack Developer with practical experience in designing and developing modern web applications using React.js, Node.js, Express.js, and MongoDB. Focused on writing clean, maintainable code and building seamless user experiences with optimized performance.
